Red wine  
11~18°C

White wine  
5~11°C

Champagne  
5~8°C

\* Champagne mode provides optimal temperature for champagne storage, and cannot be controlled on a degree basis.

## Multi-Temperature Control

Each shelves provide different temperature zones to provide optimal preserving condition according to types of wine and champagne.

# Precise Temperature Control

Advanced inverter linear compressor offers steady temperature care by  $\pm 0.5^{\circ}\text{C}$ , preventing wine's oxidation

Liquid's expansion and contraction leads

24 Hours  
Consistent  
Temperature  
 $\pm 0.5^{\circ}\text{C}$

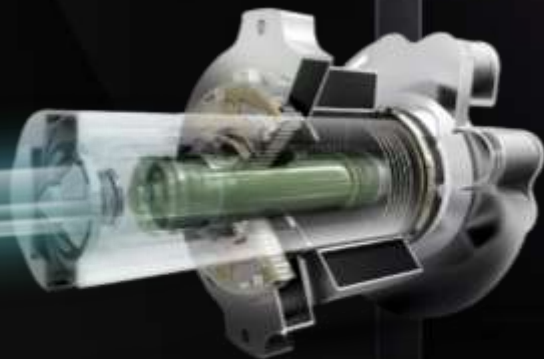

# Vibration Control

Inverter Linear compressor causes minimum vibration, of level 0 according to seismic intensity scale, preserving wine at a steady condition.

**LOW  
VIBRATION**

Average 0.55 gal

Inverter Linear compressor

(\*gal is unit for describing magnitude  
0.55 gal is considered as level '0' which means, individual  
can not feel any vibration )

# Optimal Humidity Control

Humidity control system provides perfect humidification of average 65%, maintaining wine's cork humid to maintain wine fresh

**Carbon filter**

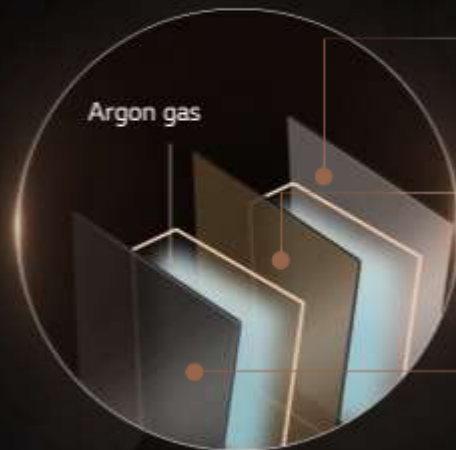

Equipped for removing odor.

# UV-Resistant

3 layered black mirrored glass blocks UV light

**UV 96%** resistant

4mm  
Tempered /  
Low-E glass

4mm  
Low-E glass  
(insulation)

4mm  
Tempered glass  
(Black mirror coating)

# InstaView®

InstaView® has a sleek mirrored glass panel that illuminates with two quick knocks, allowing you to see inside without opening the door, reducing cold air loss to preserve wine fresh.

TIMELESS DESIGN
